

Technology, lightness and performance of advanced composite materials serving Industrial Automation

WHO WE ARE

BRT INDUSTRIAL SERVICE srl is an Italian company specialized in technical advising, engineering and production of advanced composite materials components.

WHAT WE DO

Our long-standing experience in composite materials crafting is applied in several different industrial settings, such as packaging and printing machines, tissue and converting paper production equipments. Our company produces from a single piece to small or big production batches, reusable and disposable elements, according to our customers' needs. We can produce complex structures **mould-free, reducing** the level of investments required and associated costs, increasing the speed and the flexibility of the production.

This is a short overview of our offering:

- Complete equipment set for packaging machines ready to be assembled on the production lines
- Supporting equipment
- Component and accessories
- Rollers and cylinders

WHAT WE CAN DO FOR YOU

BRT INDUSTRIAL SERVICE Srl can produce a single piece for testing and can produce moulds and metallic pieces to be assembled using carbon fiber components. Each component can receive an independent quotation. Starting from your drawings (AutoCAD or 3D) and needs, we develop the right component for your business.

BRT INDUSTRIAL SERVICE Srl is committed to offer great flexibility to satisfy the most demanding customers that require absolute levels of quality and innovation. Our technical department can collaborate with your design office in order to evaluate the best solutions for new items made of composite materials.

BRT INDUSTRIAL SERVICE Srl is certified ISO 9001 : 2008 - Design and production of articles made of composite materials
